Patent Pending WO2009/034311

SecureGuard

Advanced Perimeter Protection

Temporary and fully anchored permanent applications

Prevention of vehicle intrusion from small and large vehicles

Can be configured to all shaped applications

Tested and approved to PAS 68, prevents vehicle intrusion of a 16,500 lbs vehicle at 90° (DOS K4 & K12 Standards)

SecureGuard

Advanced Perimeter Protection

SecureGuard is a high performance advanced perimeter protection system used to immobilise vehicles attempting to penetrate high security areas.

Tested to PAS68:2007 (16,500 lbs vehicle, 90 degree impact angle, 20, 30 & 50 mph), SecureGuard has proven to withstand multiple impacts whilst maintaining a secure perimeter. This meets DOS K4 & K12 Standards. The system also provides a crash friendly barrier to errant road users travelling on perimeter roads.

SecureGuard offers ease of installation with shallow foundations for permanent installations and includes the option of temporary installations.

SecureGuard

Advanced Perimeter Protection

"Meets DOS K4 & K12 Standards"
